Villas & Houses For Sale In Phuket

A *villa* was originally an ancient Roman upper-class country house. Since its origins in the Roman villa, the idea and function of a villa have evolved considerably. After the fall of the Roman Republic, villas became small farming compounds, which were increasingly fortified in Late Antiquity, sometimes transferred to the Church for reuse as a monastery. Then they gradually re-evolved through the Middle Ages, into elegant upper-class country homes. In modern parlance 'villa' can refer to various types and sizes of residences, ranging from the suburban "semi-detached" double villa to residences in the wildland–urban interface.

WHAT IS THE DIFFERENCE BETWEEN A VILLA AND A HOUSE?

The difference between a single-family home and a villa is not so much in the construction of the house as much as the neighborhood and the associated fees. A villa can have a common wall with another home but, it can be a detached villa which can look and feel exactly like a single family home.
